Steelcase Flex Kiosk Pods & Privacy Solutions

Steelcase Flex Kiosk is a practical retreat in the open plan: an office privacy pod offering visual shelter during informative, spontaneous video calls and brief focus sessions.

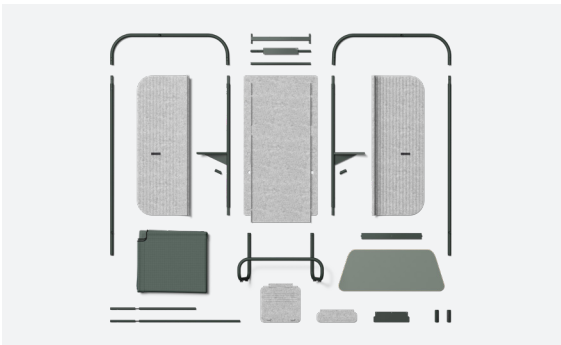

Applications

Excellent Visual Shelter in Bustling Spaces

Steelcase Flex Kiosk is a comfortable retreat in a bustling environment, a place where people can detach themselves from their surroundings. This office privacy kiosk empowers people to answer short calls, solve tasks and gather their thoughts comfortably, without getting distracted or distracting those around them.

Quick to Assemble, Easy to Use

This office privacy solution was expertly designed for easy usage. It takes only 30 minutes to fully assemble and set up the kiosk. Not only that, but organizations can quickly move it from one location to another thanks to its light frame, which weighs less than 40 kg.

A Flexible Solution for In-Between Spaces

Intentionally built for open office spaces, Flex Kiosk adapts to multiple settings. It's an ideal match for heavy-traffic areas, like hallways and work cafes, or underutilized spaces close to formal meeting rooms or designated team areas. The open design helps people maintain awareness of their surroundings while showing others a clear state of occupancy.

A Go-To Retreat for Short Sessions

Flex Kiosk supports multiple postures, offering a convenient refuge for brief focus sessions and meetings under 45 minutes. It boasts an open structure that allows light to pour inside, but it can also be paired with additional lighting and power solutions to maximize the comfort of those inside.

Performance Features

Foldable Laptop Support

The foldable laptop support accommodates different working styles while providing better camera angles during video calls.

Back Panel

The back panel boosts visual privacy, doubling as a neutral, professional background for people engaged in virtual meetings.

Fixed PET Tray

The fixed PET tray allows people to take notes while keeping small devices at eye level.

Front and Side Panels

The semi-enclosed design, with PET front and side panels, provides visual privacy, shielding people from distractions as they work.

Worksurface

A spacious worksurface provides the space needed for laptops, small devices, notebooks, or writing utensils.

Open Structure

The open structure allows ambient light to pour in, for optimal lighting during brief focus sessions or video calls.

Built-In Hook

A convenient hook lets people keep additive power solutions or personal items like bags and backpacks within easy reach.

Footrest

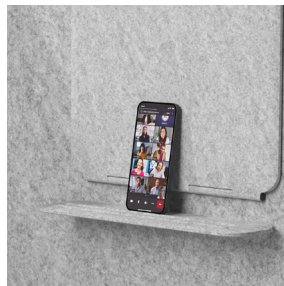

The footrest enables people to quickly switch between seated, standing, and perching postures throughout their sessions.

People + Planet

Flex Kiosk is designed for circularity and minimal resource usage. It is quick to assemble and disassemble, requiring the removal of approximately four fasteners/ part.

The product weighs around 40 kg and is packaged in one cardboard parcel to optimize the amount of products fitting into one truck and to reduce its carbon footprint during transportation. It also provides 14 spare parts for repair, which can be installed using one tool, and features the sustainable Renewed Loop fabric on the back panels.

*Accessories not included, to be ordered separately.

**Please reach out to a Steelcase representative to discover all recommended pairings.
